Hiyamee is a company giving services to the tech giants like TCS, and Wipro and other notable companies like Samsung, Shell, Morgan Stanley, Myntra, Walmart, American Express, Fidelity, and many more using the platform for their Interview as a Service model, I developed the full tracking system of the interview process and everything on PHP, Laravel, MySQL.

HR Management Portal

HRM is a software developed to monitor the employee of the company such as attendance, leave requests, salary calculation, asset management, and even resignation in a single application. The software is highly customizable for the employee preferences according to their roles. This portal also has an android application where employees can make all the requests through the application.

Wondersoft

Wondersoft is a web-based Retail Management Software designed for medium and large retail stores. It offers complete functionality from Point of Sale Operations, Store Operations, Inventory, Merchandising, Warehouse management, and Loyalty to highly configurable promotions and offers, the software is made by PERN (PostgreSQL) Stack to run smoother.

Homely Fresh Foods

Homely Fresh Foods delivers homemade food to your doorstep across Chennai with a web application that lets the users register, subscribe,s and pay in a few easy clicks. The visual calendar picker helps the user to choose the slots he wants the food for. Automatic email and mobile notifications were configured to notify users about the delivery schedules. We created an admin dashboard that helped the firm to view all the plans which are sold and the details regarding the delivery of food products. The subscription schedule will come in the admin dashboard and the drivers' logistics module. The admin can view analytics, alter plans, view customer details, and subscription details, and assign drivers to each order depending on the region.
